1 Harrison Street
Leesburg, VA 20175

Community Request for Cable Service

Loudoun County has Cable Franchise Agreements with Comcast¹ and Verizon². Both Cable Franchise agreements state "Where potential Subscribers reside in an area where an average density is below the density limitations..., the Franchisee shall extend cable to such potential subscribers under the following conditions:If fifteen (15) potential Subscribers per mile as measured in strand footage from the nearest technically feasible pointcommit themselves to taking Cable Service from the Franchisee" Complete text can be found in Section 3.1.2 of the Comcast Cable Franchise Agreement and Section 3.1.1.3 of the Verizon Franchise Agreement.

The above requirement requires a calculation of the number of residences committing to service along a cable or fiber run from the nearest location within the Franchisees cable network that has adequate capacity. This connection point will be determined after you submit this request.

If a community in Loudoun County has 15 or more potential Subscribers willing to commit to purchasing service, the Communications Commission will coordinate your request with the Franchisees to determine the technically feasible connection point, length of the cable run needed to service the community and the resultant density per mile.

Residents are requested to fill out the following information form and submit it to: Cable_and_Broadband_Administration@loudoun.gov. Please provide a resident point of contact (name, email, and daytime phone number) along with the information below. The Communications Commission will contact you with an update when there is a change in status of this request.

¹ Comcast is operating as Comcast of California/Maryland/Pennsylvania/Virginia/West Virginia, LLC

² Verizon is operating as Verizon Virginia, Inc.

1. Description of the location of the community within Loudon County: (subdivision name, town, streets, etc.), (can also provide additional page highlighting area on a map)

2. How many Residences are located in this community? _____

3. Please compile a list of residents that will commit to taking Cable Services. A minimum of 15 residents/addresses need to be submitted; however please provide all residents willing to commit to service since this will increase the likelihood of meeting the 15 residences per mile threshold.
